

SEASONAL EQUIPMENT & DOCUMENTATION CHECKLIST

Elite standards for every environment • 365-day operational excellence

Mortgage field services operate 365 days a year. To maintain preferred vendor status, your documentation quality must remain unassailable, whether it's -10°F or 100°F.

1. WINTERIZATION VERIFICATION PROTOCOL

You don't perform the winterization; you document that the preservation contractor did it right.

Photo #	Required Documentation	What to Capture
1	Plumbing Status	Main water supply shut off valve
2	Pressure Release	All faucets in the open position
3	Freeze Protection	Non-toxic antifreeze in all drain traps and toilet bowls
4	Heating Integrity	Thermostats set between 55°F and 60°F (if active) or lines tagged as "Drained" (if inactive)

2. SUMMER EQUIPMENT PROTECTION STRATEGIES

Extreme heat kills smartphone batteries and internal sensors.

Strategy	Implementation	Why It Matters
Insulated Storage	Use thermal-insulated camera bags and light-colored reflective cloths	Shields gear from direct sunlight during transit
Condensation Control	Let device acclimate gradually or use Ziploc bag to equalize temps	Moving chilled device to humid heat causes internal fogging
Battery Monitoring	Switch batteries frequently	Avoids thermal shutdown and extends equipment life

3. SPECIALIZED PROPERTY EQUIPMENT NEEDS

Property Type	Required Equipment	Purpose
Rural Properties	GIS-enabled platforms (Acres.com)	Plat map overlays to find approximate boundaries
Vacant Properties	Volt-stick (non-contact voltage tester)	Verify if electricity is active without touching wires

Commercial Properties	High-zoom optical lenses	Structural photos from the exterior
-----------------------	--------------------------	-------------------------------------

4. LOW-LIGHT PHOTOGRAPHY GUIDE

Rule	Technique	Result
The Stability Rule	Use lightweight tripod or monopod to allow slower shutter speeds (1/10th or 1/15th sec)	Eliminates "digital noise" or grain in dark rooms
The Lens Rule	Utilize "fast" prime lenses (f/1.8) or manual smartphone apps to control ISO sensitivity	Captures clear images without overexposure or blur
