

PREFERRED VENDOR SCORECARD & GROWTH ROADMAP

Scaling from contractor to strategic partner • Mastery through scope discipline

Field inspection mastery is about adherence to the "eyes and ears" scope. You are an objective observer, not a diagnostician.

PHASE 1: THE QUALITY SCORECARD ("ZERO REJECTION" TARGET)

Quality Metric	Standard	Implementation
Clinical Scripting	Use objective, clinical language only	Example: "Photo #7 shows active electrical meter at GPS coordinates \$\$, fulfilling occupancy requirement"
One-and-Done Philosophy	Complete report before leaving property	Upload all photos before shifting vehicle into drive; eliminates "callbacks"
Terminology Discipline	Never use financial terms with homeowners	Avoid: "default," "foreclosure," "delinquency" - these are outside your concern

PHASE 2: STRATEGIC RATE NEGOTIATION

Negotiate based on **Value Delivery**, not cost-of-living.

Strategy	Implementation	Outcome
Tiered Pricing	Set base rates for standard zip codes; negotiate "Rural Premium" or "Rush Surcharge"	Higher margins on specialized work
Volume Commitments	Offer "First-Right-of-Refusal" for all orders within 20-mile radius	Standardized high-volume rate with guaranteed work

PHASE 3: CLIENT DIVERSIFICATION ROADMAP

Don't rely on one firm. Diversify across the mortgage lifecycle:

Service Type	Focus	Why It Matters
Default Services	Pre-foreclosure delinquency checks	Early-stage mortgage lifecycle work
REO Specialization	Marketing-ready evaluations and vandalism checks	Bank-owned property management
Insurance Loss	Verification of repair percentages for fund release	High-value technical work

Disaster Assessment	FEMA/Disaster assessments after major events	Premium rates during crisis mobilization
---------------------	--	--

PHASE 4: MENTORSHIP & SCALING

Train a team to raise the professional floor and secure larger territories.

Training Focus	Method	Goal
Objective Observer Training	Strip away apprentice's tendency for subjective interpretation	Produce "coordinator-ready" reports from day one
Five-Second Assessment	Teach mentees to identify occupancy signs and safety hazards immediately upon arrival	Maximize efficiency and safety awareness
